Metric Definitions

Metric Definitions and Thresholds

Metric	Definition	Threshold	Denominator	Interpretation
Total Transactions	Cash plus security transaction rows	> 0 and source-complete	Not applicable	Operating volume reviewed
Reconciliation Breaks	Reconciliation break rows	Tie to 5,582 benchmark	Reconciled transactions	One transaction may generate multiple breaks
Open Exceptions	Exceptions in open, in-review, or pending-vendor status	Trend toward zero	All exception rows	Outstanding operating work
Dollar Exposure	Absolute dollar exposure represented by reconciliation breaks	Tie to source benchmark	Break rows with exposure	Financial risk represented by breaks
Python Anomalies	Records flagged by Python validation	Tie to 55,788 benchmark	Records evaluated by Python	Automated exception coverage
Breaks per Transaction	Break rows divided by transaction rows	Informational	Total Transactions	Intensity ratio, not a percentage
Over SLA Rate	Over-SLA open exceptions divided by open exceptions	Target 0.0%	Open Exceptions	Timeliness risk
Control Pass Rate	Passed controls divided by total controls	Target 100.0%	Total Controls	Control effectiveness
Injection Detection	Detected injected scenarios divided by tested scenarios	Target 100.0%	Injected scenarios tested	Validation sensitivity
KPI Tie-Out Pass	Benchmarked KPIs within the approved tolerance	Target 100.0%	Benchmarked KPIs	Model-to-source reconciliation
